an editorial....

Why Wait Until The Horse Is Stolen?

Why wait until a grand jury meets?

Why wait until a newspaper unearths a scandal?

Anyone who handles public funds should be required by law to publish a full accounting of same at regular intervals.

Frankly — both the lawmakers and the public are to blame for thievery in public office.

Every state in the Union, with few exceptions, and Texas is one of the exceptions, requires that every public official who handles public funds publish a full accounting of same at stated intervals.

When the legislators fail to act, it is time for the people to act. It is time for the people to take a hand in drafting legislation, or electing men who will do so.

During the last session of the legislature there were two bills introduced by Representative Elbert Reeves of Matador, to force publication of financial statements by the Commissioners' Courts, the school districts, and by other groups handling public monies.

Why weren't these bills passed? That's what the people would now like to know.

We think the people should ask their elected representatives just why those bills were not passed.

Any state failing to pass such legislation is guilty of tempting public officials to pocket the peoples cash. It is just as guilty as the man who takes it.

Theft of public funds is not uncommon in such states where financial reports are not required. And thievery will continue until such time as the people demand fo their elected representatives that laws be passed that remove such temptations, by requiring published reports of all receipts and disbursements by all officials entrusted with the collection and distribution of public money.

The Cameron board consented to these terms on the condition that if, in the future, Ben Arnold stopped using the property for community purposes the land and building would convert back to this school district.

Dr. Clifford Swift, president of the local board, reported that the increase in students will not be enough to change the status of any of the classes, since most of the students had been attending the local school for the past year or so. He added that since their Average Daily Attendance has been Committee of 22 citizens to discuss the problems connected with integration. POLIO CURE

Chiropractic IS effective against polio, research surveys show.

In a study of 300 acute poliomyelitis cases under Chiopractic care, conducted by the Research Department of the International Chiropractors Association, 86.7 per cent were well in an average of 46 days, wtih no residual paralysis. An additional 11 per cent were much improved.

A boy, Age 3, was brought to the Boyce Clinic, with paralysis in Right arm and leg. Examination revealed the CAUSE of the paralysis to be nerve pressure. Adjustments removed the nerve pressure, the vital energy was restored from the brain to the body, and in 4 weeks this boy was using his arm and walking normally. Many other conditions respond to the wonders of chiropractic. Try it and enjoy good health.
